Burnley St Peter's CofE Primary School

Environmental Sustainability Statement

Our Sustainability Commitment

At Burnley St Peter's CofE Primary School, guided by our Christian vision that "*Every child of God matters*", we are committed to caring for God's creation, reducing our environmental impact and building a healthier, more sustainable future for our pupils and community.

Through shared responsibility, positive choices and practical action, we aim to protect our environment and inspire future generations to become responsible stewards of our planet.

What We Commit To

To achieve this, we will:

- **Reduce** carbon emissions and improve energy efficiency.
- **Embed** sustainability into purchasing and procurement decisions.
- **Minimise** waste, increase recycling and conserve water.
- **Encourage** sustainable and active travel across our school.
- **Protect** and enhance our school grounds and biodiversity.
- **Prepare** our school for climate change and future challenges.
- **Empower** our Eco Warriors, pupils and staff to drive positive change.
- **Promote** sustainability and Christian stewardship throughout school life.
- **Work** with families, St Peter's Church and our wider community.

Supporting Our Commitment

Our Environmental Sustainability Statement is supported by our Carbon Footprint Report, Sustainability Audit, Climate Action Plan 2026-2030, Sustainable Travel Plan and our Sustainable Procurement Policy. Together, these provide a framework for measurable progress, responsible decisions and continuous environmental improvement.
